

Acme Corp — CloudSync Pro Product FAQ & Support Guide

What is CloudSync Pro?

CloudSync Pro is Acme Corp's file synchronization and backup platform for teams, supporting real-time sync across Windows, macOS, and Linux. It offers version history of up to 180 days on the Business plan and unlimited version history on the Enterprise plan.

Pricing Plans

Acme Corp offers three CloudSync Pro tiers: Starter (\$8/user/month, 100GB storage), Business (\$15/user/month, 1TB storage, admin console), and Enterprise (custom pricing, unlimited storage, SSO/SAML, dedicated support). All plans include end-to-end encryption and a 14-day free trial with no credit card required.

Data Security

All files are encrypted using AES-256 encryption at rest and TLS 1.3 in transit. CloudSync Pro is SOC 2 Type II certified and GDPR compliant. Enterprise customers can request a Business Associate Agreement (BAA) from Acme Corp for HIPAA compliance. Two-factor authentication (2FA) is mandatory for all admin accounts and optional but recommended for standard users.

Sync Conflicts

When two users edit the same file offline, CloudSync Pro creates a conflicted copy labeled with the username and timestamp, preserving both versions rather than overwriting either. Admins can enable 'Lock on Edit' mode in the Business and Enterprise plans to prevent simultaneous edits entirely by locking a file while it's being actively edited.

Cancellation & Refunds

Subscriptions can be cancelled anytime from the billing dashboard and remain active until the end of the current billing cycle. Annual plans cancelled within 14 days of purchase are eligible for a full refund. Monthly plans are non-refundable but can be downgraded at any time without penalty.

API Rate Limits

The CloudSync Pro API allows 1000 requests per minute on the Business plan and 5000 requests per minute on Enterprise. Exceeding the limit returns a 429 status code with a Retry-After header. Enterprise customers can request a custom rate limit increase by contacting their Acme Corp account manager.
